SUMMARY

Full-Stack Software Engineer with 3+ years building Laravel applications, REST APIs, and client-facing platforms, specialising in backend architecture, third-party integrations, and scalable web products with Laravel and Vue.js.

EXPERIENCE

Software Engineer (Laravel) | Systems Solutions & Development Technologies (SSD-TECH) / Dotlines

June 2023 - Present, 11 & 12th floor, Uday Tower, 57 & 57/A, Gulshan-1, Dhaka-1212, Bangladesh

- Developed and maintained 3+ full Laravel-Vue applications, handling backend logic, API design, queues, schedulers, and third-party integrations.
- Optimized and enhanced 5+ additional systems through bug fixing, performance tuning, and new module integrations.
- Delivered secure, scalable Laravel APIs with middleware, policy-based authorisation, request validation, and real-time updates via Firebase, MQTT, and Event Listeners.

Intern, Automation Team (Technology Division) | BRAC Bank Limited

February 2023 - May 2023, Sepal Platinum Tower, Tejgaon Industrial Area, Dhaka-1208, Bangladesh

- Automated internal banking workflows using Python, Selenium, and PyAutoGUI, reducing manual form-handling time by 70%.
- Built a computer-vision tool to extract passport/ID photos from scanned documents (PDF/TIFF), improving processing speed by 50%.
- Supported the team with debugging, testing, and automating manual tasks.

PROJECT

Agrani Bank Remittance App | Systems Solutions & Development Technologies (SSD-TECH) / Dotlines

play.google.com/store/apps/details?id=com.agranibank.app.malaysia, May 2024 - Present

- Developed scalable REST APIs in Laravel for remitter registration, beneficiary handling, and transaction workflows, supporting tens of thousands of active users.
- Integrated Agrani Bank's XML/SOAP APIs for core banking data sync and automated updates, cutting manual verification by 30% and integrated the FPX payment gateway.
- Built a multilingual Vue.js frontend by converting static UI designs into responsive, reusable components, improving load performance by 20%.
- Implemented push notifications, device binding, OTP verification, and cross-device session sync using Firebase and MQTT, reducing failed logins by 40%.
- Designed modular backend architecture with service classes, repository pattern, validation layers, and API docs, cutting code duplication by 25%.

Laopay (MFS Application) | Systems Solutions & Development Technologies (SSD-TECH) / Dotlines

play.google.com/store/apps/details?id=app.laopay, July 2025 - Present

- Improved wallet and merchant transaction accuracy by 30% through fixing core API logic, optimizing balance calculations, and resolving long-standing registration/onboarding issues used by 50k+ active users.
- Implemented QR payment processing (EMV static & variable-amount QR, CRC validation, receipt generation) and strengthened OAuth-based authentication with encrypted API communication, reducing failed or incomplete transactions by 25%.
- Automated onboarding and notification workflows using Redis-queue jobs, Firebase push alerts, and MQTT channels, cutting manual operational effort by 70% and lowering user login/OTP failures by 40%.

Central City Hotel Booking & Marketing Website (KL, Malaysia) | Freelance Client Project

centralcityhotelkl.my, January 2026 - Present

- Built a 12-page website for a 102-room hotel using Laravel, Blade, Tailwind CSS, Vite, and MySQL, covering rooms, restaurant, FAQ, contact, and policy pages.
- Implemented SEO, WhatsApp/contact enquiry flow, 250 country-code support, 2 automated emails, and XML sitemap plus metadata handling.
- Developed a Filament admin panel with a 7-widget visitor analytics dashboard and optimized responsive UI and image delivery across desktop and mobile.

EDUCATION

Bachelor of Science in Computer Science and Engineering | Brac University

3.67 / 4.00, Dhaka, Bangladesh, 2022

Higher Secondary Certificate (Science) | Mirpur Cantonment Public School and College

4.83 / 5.00, Dhaka, Bangladesh, 2018

Secondary School Certificate (Science) | Motijheel Ideal School and College

5.00 / 5.00, Dhaka, Bangladesh, 2016

SKILLS

Backend & APIs: PHP, Laravel, RESTful APIs, Passport, Sanctum, XML, Filament, SEO

Frontend & Mobile: Vue.js, Vue Router, Vuex, JavaScript, TypeScript, Blade, Capacitor

Database & DevOps: MySQL, Query Optimisation, Indexing, Redis, Git, GitHub, Docker, Composer, npm, Postman Optimisation

Architecture, Testing & Processing: Clean Architecture, MVC, Service Classes, Repository Pattern, PHPUnit, API Testing, Logging, Laravel Queues, Workers, Scheduler, Notifications, Firebase, FCM, MQTT, FPX Integration, PDF Generation, API Documentation
